

**SEALANTS & ADHESIVES
THAT DELIVER HIGH
PERFORMANCE
WITHOUT THE RISKS**

Chem Link formulates and manufactures high performance adhesives, sealants and related products that do no harm to installers, occupants and the environment. These products are sold and marketed through three business units: construction & maintenance, private label and industrial/OEM. Our products are based on proprietary formulations that combine the highest performance with low environmental and human health risks.

Chem Link is an idea company, dedicated to innovation and problem-solving with a vast knowledge of the climates, testing standards, construction issues, government regulations and business conventions throughout North America.

SINCE
1990

1 
TRAINING
CENTER

Since our founding in 1990, Chem Link has focused on meeting the pressing needs of contractors, consumers and industries. Our founder was an inventor and developer who created Chem Link and grew it into the company that it is today.

In 2016, Chem Link joined the SOPREMA family. Since then, we have expanded and invested in our manufacturing processes to provide our customers with quality products and customer service. Today, we are a fully integrated company located in Schoolcraft, Michigan with two manufacturing locations nationwide.

A SOPREMA[®] GROUP COMPANY

COMMITMENT TO QUALITY

Quality is a top priority in all aspects of business at Chem Link. Our fully staffed research & development facility has over 60 years of combined experience, with over 25 years of mastering polyether and silicone technologies. With the ability to customize and develop formulations to optimize performance and physical properties, we continuously test products to ensure that we are providing only the highest quality products.

In 2015, Chem Link received our ISO 9001 certification. This certification provides our customers with the assurance that all Chem Link products are developed and manufactured to a consistent and quality standard. In addition, our chemists, product development engineers, technicians, and senior scientists are continuously working to improve our currently quality standards.

COMMITMENT TO SUSTAINABILITY

Never before has the impact of sustainable construction been so important than it is in our world today. Since day one Chem Link has been an environmentally conscious company. Our corporate commitment can be summarized in three primary categories of our business:

- **Engaged Employees**
- **Products & Sustainable Development**
- **Responsible Manufacturing**

Our specialty lies in the development of Silyl Terminated Polyether Technology (STPE) technology. Inherently solvent free with little to no VOC content, this technology poses no threat to installers or building occupants and is environmentally friendly. These products are used throughout the SOPREMA Group of Companies in a variety of applications and types of construction.

As a SOPREMA Group Company, being on the forefront of responsible product design, sustainable operations and engaging our employees to participate in pushing the envelope for a greener tomorrow, has been at the heart of the company's mission and core values for years.

ADHESIVES, SEALANTS, SYSTEMS & ACCESSORIES

RESIDENTIAL ■ COMMERCIAL ■ SPECIALTY

ROOFING

Chem Link offers a variety of non-toxic, solvent free roofing sealants and adhesives that bond to a variety of roofing materials to cure quickly into a durable, waterproof, rubber seal. The essential **M-1®** product is unmatched, bonding and sealing a wide range of construction materials, while the **DuraLink™** line accommodates joint movement and color matching. Chem Link's unique **E-Curb™** system is designed specifically for sealing roof penetrations of any size or shape.

CONCRETE & MASONRY

NovaLink™ is a line of non-toxic, high quality, moisture curing elastomeric waterproofing sealants that are designed to be used with many building materials, while withstanding damp, dry and cold conditions.

SPECIALTY

Chem Link offers a line of specially formulated products for highly sensitive clean rooms, below-water marine applications and sealing close fitting joints and seams in recreational vehicles.

WINDOWS, DOORS, & SIDING

Chem Link's **DuraLink™** product line offers a high quality, moisture cure sealant that is 100% solids, and will not shrink. With multiple joint movement options, ability to bond to most construction materials and extensive color matching, it's the perfect product for sealing around windows, doors and siding.

MULTI-PURPOSE

Chem Link offers several multi-purpose products to seal a wide range of construction materials. The **M-1® Universal Adhesive & Sealant** is essential on any jobsite. Another multi-purpose sealant, **Clear**, comes in a transparent formulation for multiple applications and surfaces.

FLOORING & WALLS

The **Secure** product line includes adhesives for bonding drywall, gypsum, stone, foam and ceiling systems along with a fast setting structural adhesive for "panel on frame" assemblies in commercial and residential construction.
