

PRIVATE LABEL

SEALANTS & ADHESIVES THAT DELIVER
HIGH PERFORMANCE WITHOUT THE RISKS

ABOUT CHEM LINK

Chem Link formulates and manufactures high performance adhesives, sealants, coatings and related products through three business units: construction & maintenance, private label and industrial/OEM. Our products are based on proprietary formulations that combine the highest performance with low environmental and human health risks.

Since our founding in 1990, Chem Link has focused on meeting the pressing needs of contractors, consumers and industries. Our founder was an inventor and developer who created Chem Link and grew it into the company that it is today. In 2016, Chem Link joined the SOPREMA family. We are committed to continuing to grow and invest in our manufacturing processes to provide our customers with quality products and customer service. Today, we are a fully integrated company located in Schoolcraft, Michigan with 2 manufacturing locations nationwide.

Quality is a top priority in all aspects of business at Chem Link. In 2015, Chem Link received our ISO 9001 certification. This certification guarantees our customers that all products produced by Chem Link will meet all customer and regulatory requirements. In addition, our chemists, product development engineers, technicians, and senior scientist are continuously working to improve our currently quality standards. Our fully staffed R&D facility has over 60 years of combined experience, with over 25 years of mastering polyether and silicone technologies. With the ability to customize and develop formulation to optimize performance and characteristics, they continuously test products to ensure that we are providing only the highest quality products.

WHY PRIVATE LABEL WITH CHEM LINK?

Chem Link offers dozens of proven high performance formulations that will meet most customer needs. However, we routinely develop "design spec formulations" for customers who require specialized properties (adhesion, tack-free time, viscosity, elongation, hardness, tensile strength and more). Chem Link is positioned to handle your product requirements, yet agile enough to personally assist you in meeting your unique goals.

INNOVATIVE BUSINESS SOLUTIONS

- Create a profit center for your business
- Broaden product line offering
- Save time and developmental costs
- Competitive advantage over other chemistries and technologies
- Increase mixing/compounding or filling capacity
- Custom color matching
- Launch products to market faster
- Design spec formulation services
- ISO 9001 certified manufacturing processes
- Toll manufacturing-overflow capacity
- Multiple packaging solutions
- Experts in polyether, silicone, and 2k polyurethane chemistries

CHEM LINK SEALANTS & ADHESIVES ARE FORMULATED TO BOND TO A WIDE RANGE OF MATERIALS TYPICALLY USED BY MANUFACTURERS

STONE

WOOD
COMPOSITE

MASONRY

CONCRETE

DRYWALL

WOOD

PLASTIC

COATED METAL

RUBBER

METAL

GLASS

FIBERGLASS

ADVANCED POLYMER TECHNOLOGY

- Solvent-free, non flammable, no odor
- No shrinking - 100% solids
- Low VOC
- No risk to human health or the environment
- No off gassing
- Carcinogen free
- Product contains no components listed in California Proposition 65
- Excellent range of physical properties including strength, elasticity, adhesion, and weathering
- Expertise from the pioneer of STPE, polyether and MS polymer

R&D CAPABILITIES

- Fully staffed lab to assist with testing and formulations
- 27 years of mastering polyether and silicone technology
- Over 60 years of combined experience - chemists, product development engineers, technicians, and senior scientists
- Ability to customize or develop formulations to optimize performance characteristics
- Scale up capabilities - 500 gram, 2 gallon, 8 gallon, 90 gallon, or custom
- Custom color matching

MANUFACTURING EXPERTISE

- ISO 9001 - 2015 Certified
- 98% On-time delivery
- Approved tier 2 automotive supplier
- Two manufacturing locations
- Operate 6 days, 3 shifts
- Mixing/compounding from 30 gallon to 1500 gallon capacities

THE CHEM LINK ADVANTAGE

EXPERTS IN POLYMER INNOVATION

MARKETS

- Roofing
- Doors, windows, siding
- Waterproofing
- Air barriers
- Concrete construction
- Mechanical contracting
- Hardscape
- Flooring
- Retail
- Solar
- Transportation-RV, trailer
- Marine
- Manufacturing/OEM

TECHNOLOGIES

- Modified-bitumen roofing adhesives
- Single-ply roofing adhesives
- Liquid waterproofing
- Sealants
- Construction adhesives
- Air barriers
- Liquid flashing
- Liquid applied coatings
- Primers
- Tapes
- Roof penetration seals

PACKAGING

- Cartridges
- Sausages
- Squeeze tubes
- Dual component cartridges
- Pouches
- 1-5 gallon pails
- 55 gallon drums
- 300 gallon visco drums
- 330 gallon totes

AN INDUSTRY INNOVATOR

MEET THE TEAM

ANGIE DEGRAAF

Inside Sales/Customer Service

Angie is responsible for processing orders, coordinating product launches along with customer interaction and communication. With the ability to anticipate customer needs, Angie goes above and beyond for our customers on a daily basis. She enjoys getting to know customers on a personal level, especially when she has the opportunity to meet with them in person. Before joining Chem Link, she previously worked in the computer, mortgage and banking industries.

✉ adegraaf@chemlink.com

PAUL HUNTER

Private Label Sales Manager

Paul is tasked with generating sales opportunities with new and existing customers. He does an excellent job of finding solutions to customer needs, developing strong relationships, and managing accounts. Paul is eager to offer technical assistance as necessary to meet the demands of product applications. He has experience in field services and sales in the store fixture and transportation industries.

✉ phunter@chemlink.com

D.J. KETELHUT

National Sales Manager

As the National Sales Manager, D.J. often meets with Private Label prospects and customers, helping them uncover the power and profit associated with private labeling or tolling. His background the last 15 years has been in sales management for the building material industry. He enjoys coordinating the sales teams for two divisions focused on selling and marketing high-performance sealants, adhesives, and coatings. D.J. is a firm believer in putting the customer first with a relationship built on trust and integrity.
